<p><b>Name</b></p> <p>Crypto Workshop Pty Ltd</p> <p><b>Website</b></p> <p><a href="https://www.cryptoworkshop.com">https://www.cryptoworkshop.com</a></p> <p><b>US Federal Contractor Information</b></p> <p>DUNS: 747103398 CAGE: Z14H2</p> <p><b>Legal Address</b></p> <p>85 The Crescent Ascot Vale Vic 3032 Australia</p> <p><b>Postal Address</b></p> <p>PO Box 398 Ascot Vale Vic 3032 Australia</p>	<p><b>Description</b></p> <p>Crypto Workshop was set up to help people better use and understand the open source Bouncy Castle Cryptography APIs for Java and C#. In addition to looking after the implementation and certification of Bouncy Castle FIPS 140 efforts and doing further work on the general Bouncy Castle APIs, we also offer support contracts, consulting and other assistance for organisations developing and deploying solutions using Bouncy Castle.</p> <p>Technical Support provided is first level and our team includes founders and long term committers to the Bouncy Castle project. Support also includes early access to the BC FIPS work, as well access to testing tools and other utilities for people wishing to customize or simply get access to new features prior to the final certified release.</p> <p>Crypto Workshop is a member of the <a href="#">AFCEA</a></p> <p><b>Goods/Services</b></p> <p>NAICS Code 541511 – Custom Computer Programming Services</p> <p><b>Price List and Further Information</b></p> <p>Our price list and further information can be found at:</p> <p><a href="https://www.cryptoworkshop.com/support_faq.html">https://www.cryptoworkshop.com/support_faq.html</a></p> <p>The price list is linked off the last answer on the page. Please feel free to get in touch with our point of contact for further information.</p>
